

For Immediate Release

## Tracking Lost and Found Items in a Hotel

CEDAR RAPIDS, IA – November 30, 2015 – qMetrix Group's RoomChecker® mobile inspection app can now be used to track Lost and Found items. Managing items in a hotel that have been misplaced or lost is a daunting task. RoomChecker® makes this job easier by tracking the location of the found item and matching it with the guest's lost item report. By using RoomChecker®, staff are informed immediately when an item has been found and how to return it to the guest.

Hotels deal with hundreds of items over the course of a month, and many struggle with an easy and effective way to keep track of them all. With RoomChecker®, staff can inform the guest as soon as an item has been found. This real-time messaging allows staff to provide better customer service with improved guest satisfaction.

qMetrix Group's RoomChecker® app continues to evolve and provide more value for room inspections. More enhancements like this will be introduced over the coming months. The RoomChecker mobile app is available for iOS and Android. A full-featured website hosts all data and easy to use reports.

### About qMetrix Group

The qMetrix Group focuses on developing innovative software solutions for quality improvement. The group develops systems to gather and report quality metrics through electronic integration or customized apps using wireless devices such as tablets and smartphones. qMetrix then provides secure, customized, web-based reports to better improve the real-time performance for any organization seeking to improve quality and efficiency. qMetrix supports applications for Healthcare, Hospitality and Transportation.
