

For Immediate Release

RoomChecker®, Mobile Hotel Room Inspection App Usage Expands

CEDAR RAPIDS, IA – December 22, 2014 – RoomChecker® use is expanding across the United States. This app is a unique and flexible mobile solution for hotel room inspections. Hotels can manage housekeeping, maintenance and staff issues. RoomChecker® can also be customized to fit the needs of any hotel. This flexibility is drawing more locations to try and use the app every day. RoomChecker® is used in Florida, Iowa, Texas, California and, most recently, Oregon.

With RoomChecker®, hotels can inspect any number of rooms. Whether the room is a double, king, suite or conference room all inspections can include only the items in that type of room. The app has been found to help with training and staff development. Reports with trends and details are available for rooms, items and staff. Managers can use the report 24/7 from any Internet browser.

Interest in this unique solution is also spreading to other countries including Australia, India, Italy, Switzerland, and the UK, just to name a few. The available customizations allow hotels and resorts to add options in their native language. Users are saving time and money and improving staff efficiency giving their guests a great experience.

About qMetrix Group

The qMetrix Group focuses on developing innovative software solutions for quality improvement. The group develops systems to gather and report quality metrics through electronic integration or customized apps using wireless devices such as tablets and smartphones. qMetrix then provides secure, customized, web-based reports to better improve the real-time performance for any organization seeking to improve quality and efficiency. qMetrix supports applications for Healthcare, Hospitality and Transportation.
